

Coquitlam Boom Lift Training

Coquitlam Boom Lift Training - Aerial platforms or also known as elevated work platforms are devices which allow workers to carry out duties and tasks at elevated heights that would not be otherwise reachable. There are different aerial lifts available to perform different applications under different site conditions. If carelessly operated, elevated work platforms could lead to serious injury or fatality. The most common reasons for related accidents are electrocution, falls, crushed body parts and tip-overs. Lift operators should be trained completely in procedures in order to prevent accidents while operating lifts.

Aerial Lift Safety course is intended for individuals who need to operate the devices more safely and effectively. The course provides thorough instruction about the most utilized lifting devices in the business.. Kinds of lift covered include boom supported, scissor and articulating aerial lifts. The video presents the proper techniques operators must follow. Instruction focuses on protection against falls, pre-operational check, safe driving procedure and stability of the device.

The boom lift training course will help to deal with employee safety and equipment reliability, utilizing materials that are fully compliant with your regional and local requirements and regulations. Course management and training methods will be taught. The trainer will also become well versed in the technical aspects of aerial lift safety.

Components of the Boom Lift Training course consist of both classroom training and practical training. Both sessions should be successfully finished for the participant to receive a certificate of achievement.

The difference between self-propelled elevating work platforms and self-propelled boom-supported elevating work platforms is that, on the latter type, work platforms could be positioned entirely beyond the base of the machine. The theoretical component of the training is practically the same for both kinds. The practical component of the training can be completed sooner if just one kind of machinery is utilized.

Elevating Work Platform Training Program Objectives:

Aerial Platform/Boom Lift Training provides competency requirements for safely operating Boom-Type Elevating Work Platforms and Self-Propelled Elevating Work Platforms (for use on paved/slab surfaces). Training would help operators to efficiently use elevating work platforms while decreasing the possibilities of a costly workplace accident. Trainees would review of company policies and applicable rules, discuss Due Diligence, review Criminal Negligence and consequences to trainers, employers, employees and supervisors. Participants will study machine features, operating procedures, stability, parking and fueling/charging procedures. Site-specific safety matters would be addressed.
